

Finance for Biodiversity Pledge

We, 190 financial institutions, representing EURO 22.6 trillion in assets, call on global leaders to take effective measures to reverse nature loss this decade and to ensure ecosystem resilience.

As financial institutions, we know that healthy societies, resilient economies and thriving businesses rely on nature. Together let's protect, restore, and sustainably manage our natural resources. We make every effort to take our share of responsibility and contribute to the protection and restoration of biodiversity and ecosystems through our financing activities and investments.

We, therefore, commit to do the following by 2024 at the latest, or within two years after signing:

1

Collaboration and knowledge sharing

We will collaborate and share knowledge on assessment methodologies, biodiversity-related metrics, targets and financing approaches for positive impact.

2

Engaging with companies

We will incorporate criteria for biodiversity in our ESG policies, while engaging with companies to reduce their negative and increase positive impacts on biodiversity.

3

Assessing impact

We will assess our financing activities and investments for significant positive and negative impacts on biodiversity and identify drivers of its loss.

4

Setting targets

We will set and disclose targets based on the best available science to increase significant positive and reduce significant negative impacts on biodiversity.

5

Reporting publicly

We will report annually and be transparent about the significant positive and negative contribution to global biodiversity goals linked to our financing activities and investments in our portfolios.
