## **Finance and Biodiversity Webinars**

#### Webinar

How to measure biodiversity impact? Guidance on approaches and tools

12 July, 2 – 3pm CEST Version / date: 17 June 2022

## Introduction

<u>UNEP FI</u>, the <u>EU Finance@Biodiversity Community</u> and the <u>Finance for Biodiversity</u> <u>Foundation</u> will organise two webinars on biodiversity data and measurement approaches.

On 30 June, we present the findings from the report 'Nature in a Haystack' which identifies the availability and suitability of publicly available nature-related data to support financial decision-making in five case-study countries.

This webinar on 12 July will update you on the latest developments in impact assessment by financial institutions, based on the revised edition of the 'Guide on biodiversity measurement approaches' that is currently in the making.

Read more on both webinars and register for the 12 July webinar
