

Webinar

Nature in a Haystack - how to use publicly available nature-related data

30 June, 2 – 3pm CEST

Version / date: 17 June 2022

Introduction

[UNEP FI](#), the [EU Finance@Biodiversity Community](#) and the [Finance for Biodiversity Foundation](#) will organise two webinars on biodiversity data and measurement approaches.

On 30 June, we present the findings from the report ‘Nature in a Haystack’ which identifies the availability and suitability of publicly available nature-related data to support financial decision-making in five case-study countries.

The 12 July webinar will update you on the latest developments in impact assessment by financial institutions, based on the revised edition of the ‘Guide on biodiversity measurement approaches’ that is currently in the making.
